STAY CONNECTED

It's a moment to meet again, smile, recharge the batteries, rediscover the energy worn out by uncertainty, and lift the Team spirit!

The questions we started from:

How can I bild relationships and develope a sense of belonging in a team whose interactions have become mostly digital or telephone?

How can I keep the motivation and engagement of the people of my team high?

How can I make connections in a team that works remotely?

How can I create moments of relational accelleration?

THE PROJECT

Now more then ever resilience, motivation, teamwork and the ability to understand and manage complexity, become essential to face what lies ahead.

Smart Working has gone from being an opportunity to being the only way possible.

This sudden change requires support for each individual of the the team and the team itself in order to install and/or reinforce a sense of belonging, strengthen every relarionship and facilitate the flow of new ideas.

A fun experience (with the possibility of inserting content chosen with the company), which may also include a prize for the best classified.

A moment of connection to find each other and recharge with energy and positivity!

A digital experience,
with REAL emotions.
